Request to Correct Errors in the Published Application

There are several errors in the published patent application.

1. A table following paragraph 128 (of the USPTO) publication does not appear in the formatted PDF version of the application that is available through Delphion. However, this table is present in the HTML version of the document available in PAIR under "Published Documents". This paragraph corresponds to paragraph 103 on page 33 of the application as originally submitted by the applicant.
2. Appendices A to D are missing from the publication in both the PDF and the HTML versions. These appendices are on pages 107 to 131 of the application as originally filed and are also present in the original filing papers available in PAIR under the heading "Image File Wrapper" and the entry "Specification".

Please ensure that these missing parts of the application are included in the issued patent.
